

Modeling Intern Training Document

Getting start with Blender -

This is what you will see when you first open Blender. This is called the 3D Viewport.

On the left-hand side you have a small toolbar. In the centre is your scene. At the bottom of the page is your timeline. On the top right-hand side, you have a list of all the objects in your scene. This is called the Outliner. This is where you can name the objects and collections in your scene. On the bottom right-hand side, you will find your properties panel. This is where most of the settings can be found.

Moving around in Blender -

Scene Rotation – Hold middle mouse key and drag the mouse.

Scene Pan – Hold Shift key + Middle mouse key together and drag the mouse.

Scene Zoom in and out – Hold Ctrl key + Middle mouse together and drag the mouse.

To Zoom into a particular area of any 3D object –
